Diabetes Awareness Month

Tobacco Awareness Month

Diabetes is one of the leading causes of disability and death in the United States. If it's not controlled, diabetes can cause blindness, nerve damage, kidney disease, and other health problems.

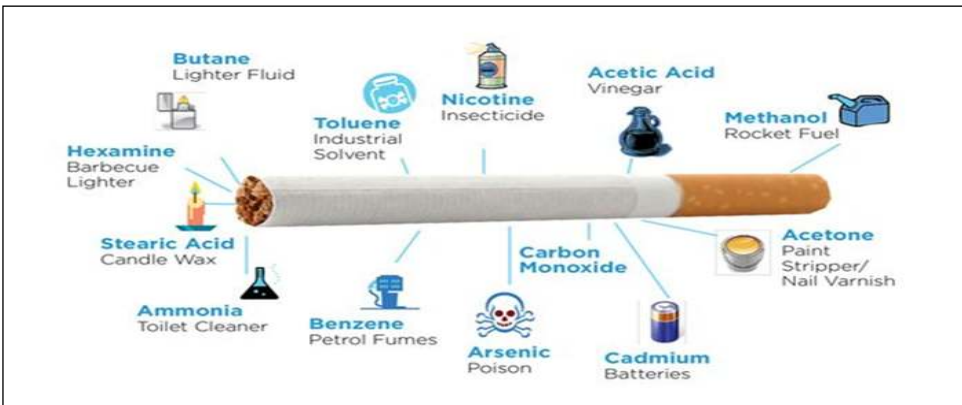

The good news? People who are at high risk for type 2 diabetes can lower their risk by more than half if they make healthy changes. These changes include: eating healthy, increasing physical activity, and losing weight.

We can use this month to raise awareness about diabetes risk factors and encourage people to make healthy changes.

Here are just a few ideas:

Encourage people to make small changes, like taking the stairs instead of the elevator.

Talk to people in your community about getting regular checkups.

Attention

**PLEASE REMIND THE KIDS TO STAY
OFF THE TOWNS GRAVEL BACK
BEHIND THE SHOP!!!!**
